

Hello,

Thank you for your interest in apply to Quality Engineering roles in HMH. We really appreciate your interest in joining our team.

As part of the interview process, you are required to complete a brief technical assignment for review by our team. Below you will find the details.

Instructions

This is your chance to display your technical skill to test a public REST endpoint.

The endpoint is

<https://developers.zomato.com/documentation#!/common/cities>

You will need to generate an api key with zomato to authenticate requests.

The task is to code a suite of tests that validates the main functionality of the above endpoint.

You can choose any language and technology you feel most comfortable with.

You do not need to test every use case, just the main functionality.

Please provide

1. A project that we can run which demonstrates how you validated the endpoint. Please document your code as you see fit to make it easily understandable.
2. Instructions how we can compile and run the Scenarios.
3. Briefly mention some of the scenarios that you did not cover and any other relevant details of how you approached the assessment.

How to submit

1. Please provide elizabeth.murphy2@hmhco.com with a link to a GitHub repo where we can clone the project.
OR
2. Zip up your code and send it in via email to elizabeth.murphy2@hmhco.com

Timelines for Submittal

Please submit **within 7.00** days of receiving this assessment. If you have it done earlier, that's fine to submit as the sooner we receive it, the sooner we can review.

If you may not meet this timeframe or require an extension, please e-mail elizabeth.murphy2@hmhco.com and cc robbie.fineberg@hmhco.com to advise us.

Thanks so much for all your time and effort and best of luck.

Kind regards,

Quality Engineering & Recruitment Team
